New V.I.P Road Vadodara - 390022

PROFILE

I'm a frontend developer adept in HTML, CSS, and basic JavaScript, specializing in web animations using tools like Locomotive, ScrollTrigger, and GSAP. I create engaging user interfaces with smooth animations, aiming to enhance user experience and interactivity on the web. I bring a keen eye for detail and a dedication to creating memorable user interactions through seamless animations and modern frontend techniques.

SKILLS

INTERNSHIPS

ARTH TECHNOLOGY - Vadodara

Sep 2022 - Oct 2022

Web Development - 6 weeks

- The website includes a Home Page with engaging visuals and animations showcasing services, while the About Page provides company details and team information. A Contact Page features a user-friendly form for easy communication. The Gallery highlights past events with photos, and the Order Page offers an interactive form for customizing and placing balloon orders, ensuring a seamless user experience.

BrainyBeam Technologies Pvt. Ltd.

Jul 2023 - Aug 2023

App Development - 6 weeks

- The project included a Login/Signup system for secure user authentication and registration, a Profile Editing feature allowing users to update personal information easily, and Cart & Wishlist functionalities for adding products conveniently. Additionally, an Order Placement system was implemented for a smooth purchasing process.
